FIELDNOTES WORKSHEET / POINT OF CHANGE / OPERATIONS

Project Warning Review

Companion to What Your Dashboard Learns Too Late

Pick one delayed job and work back from the last moment when a different action was possible.

1. **Observed issue and the decision it affected**

2. **First observable signal and when it was available**

3. **Last practical time to act**

4. **Named decision maker and escalation route**

5. **Response, timing, and result for the job**

6. **What to change in the next review**
